

TRANSVERSAL GANTRY-TYPE PALLETIZER PT4

Transversal gantry-type palletizer TP4 incorporates a lifting and travelling system activated by hydraulic unit.

Clamp fitted with **180° rotation** powered by **hydraulic gear motor** and **4 sides tightening**. Lifting counter, travel and rotation movements with proportional hydraulic control.

TECHNICAL DETAILS

- Load capacity: 400 kg
- 4 sides palletization.
- Maximum height of palletization: 1400 mm
- Clamp rotation: 0°, 90° and 180°
- 8 palletizing programs according each precast concrete piece.
- Possibility of memorizing and saving the chosen configuration.
- Clamp travel and lifting movements powered by proportional valves ensuring higher smooth movements.
- Laser heights control.
- PLC and HMI control.
- 100 palletizing cycles/hour.

NEW FEATURES

- ✓ Proportional movements
- ✓ Clamp rotation: 0°, 90° and 180°
